Full-stack engineer with 14 years of production experience. I care about software that works well and feels good to use, and I'm hands-on across the whole stack, from architecture down to the small UI details. Right now I'm deep in AI-native development and looking for a team solving interesting problems. Write-ups and screenshots at mfillalan.github.io/mfillalan-portfolio.

HIGHLIGHTS

- 14 years of professional software engineering
- Leading the WILD 2.0 rebuild from legacy Web Forms to React, TypeScript, and ASP.NET Core
- AI-native workflows built on durable memory, MCP, and agent tooling

CORE SKILLS

C# / .NET · ASP.NET Core · React · TypeScript · JavaScript · MSSQL / Oracle · REST API Design · Legacy Modernization · AI-Native Dev · MCP Protocol · GitHub / CI/CD

EDUCATION

M.S. Information Systems
ECPI University · 2011 – 2012

B.S. Computer Information Science
Simulation & Game Programming
ECPI University · 2006 – 2009

PROFESSIONAL EXPERIENCE

Software Engineer
May 2022 – Present

Serco

- Core engineer on WILD, a mission-critical naval inventory system.
- Leading the WILD 2.0 rebuild from VB.NET / Web Forms / Oracle to React, TypeScript, ASP.NET Core, and MSSQL.
- Set the architecture direction and migration plan, and deliver features for a live production system.

Software Engineer
Sep 2021 – May 2022

Valiant Integrated Services

- Maintained and improved the WILD platform during a contract transition.
- Shipped production features and fixes on the ASP.NET Web Forms / Oracle stack.

Software Engineer
Feb 2019 – Sep 2021

Alliance Technical Services, Inc.

- Built and maintained inventory features supporting naval operations.
- Worked with stakeholders to turn requirements into production-ready features.

Programmer I
Feb 2013 – Nov 2017

Serco

- Built functionality for WILD inventory modules.
- Maintained VB.NET and ASP.NET Web Forms code in a long-running production system.

Programmer
2009 – 2011

L-3 Communications

- Built new features for SABER, a naval inventory system on ASP.NET and VB.NET.
- Cleaned and maintained SQL Server data to improve integrity.

SELECTED PROJECTS

Dendrite Wiki

Local-first MCP server on npm that gives AI coding agents a living markdown knowledge base, project memory, and lightweight habits. One command (npx -y dendrite-wiki) installs it into nine agent clients, including Claude Code, Codex, Cursor, and Copilot. Its capsule profile cuts MCP startup from ~5,300 to ~540 tokens.

TypeScript · MCP · Node.js · VitePress · Tree-sitter · npm

DendriteMCP

Rust memory daemon that gives coding agents durable, searchable context across sessions. Uses SQLite + sqlite-vec for vector recall, a relationship graph with per-edge decay, and a background tokio task that consolidates memories with a local Ollama model. Ships with an MCP stdio bridge and a React dashboard.

Rust · Tokio · Axum · SQLite · MCP · Ollama · React
