Full-stack engineer with 14 years on WILD, a naval inventory platform used in real operations. I lead the WILD 2.0 rebuild from VB.NET / Web Forms / Oracle to .NET 8, React 19, and an offline-first PWA: architecture, migration, and features on the live system. I also build AI developer tools (Tendrite, Dendrite Wiki). Looking for a remote senior role on a product with real operational stakes. Write-ups and screenshots at mfillalan.github.io.

HIGHLIGHTS

- 14 years on WILD, a naval inventory platform used in real operations
- Lead engineer on WILD 2.0: VB.NET / Oracle to .NET 8, React 19, and an offline-first PWA. Build is done. 1.0 still runs daily ops
- Created Tendrite, a local-first AI engineering harness for agent context, model routing, and Git-native review

CORE SKILLS

- C# / .NET
- ASP.NET Core
- React
- TypeScript
- JavaScript
- MSSQL / Oracle
- REST API Design
- EF Core
- Legacy Modernization
- Offline-first / PWA
- AI Agent Workflows
- Codex / Claude Code / Grok
- MCP / Model Routing
- GitHub / CI/CD

PROFESSIONAL EXPERIENCE

Software Engineer May 2022 - Present
Serco

- WILD is a production inventory system used in naval operations. I have been on this platform across Serco, Valiant, Alliance, and L-3 since 2009, from feature work to leading the 2.0 rebuild.
- Lead engineer on WILD 2.0: VB.NET / Web Forms / Oracle to .NET 8, EF Core, React 19, TypeScript, MSSQL, and an offline-first PWA. Build is done. 1.0 still runs daily ops. Next is a testing event.
 - Set the architecture and migration plan, then shipped features on production 1.0 so the rewrite did not freeze daily work.
 - Designed the offline-first PWA path so operators can keep working when connectivity drops, then sync without corrupting inventory.
 - Worked with analysts, operators, PMs, and QA to turn operational requirements into production behavior.

Software Engineer Sep 2021 - May 2022
Valiant Integrated Services

- Kept WILD healthy through a contract transition. Shipped inventory features and fixes on ASP.NET Web Forms / Oracle without a service gap.

M.S. Information Systems
ECPI University | 2011 - 2012

B.S. Computer Information Science
Simulation & Game Programming
ECPI University | 2006 - 2009

Software Engineer Feb 2019 - Sep 2021
Alliance Technical Services, Inc.

- Built and maintained WILD inventory features for naval operations on the live Web Forms / Oracle system.

Programmer I Feb 2013 - Nov 2017
Serco

- Built and maintained WILD inventory modules on VB.NET and ASP.NET Web Forms.

Programmer 2009 - 2011
L-3 Communications

- Built SABER inventory features on ASP.NET and VB.NET. Cleaned SQL Server data to restore integrity.

SELECTED PROJECTS

Tendrite
Local-first AI engineering harness for multi-agent work, durable memory, model routing, and Git-native review. Open core at tendrite.dev.
Desktop · Local-First · Multi-Agent · Memory · Git · Model Routing

WILD 2.0
Lead engineer on the rebuild of a naval inventory platform from VB.NET / Web Forms / Oracle to .NET 8, EF Core, React 19, and an offline-first PWA. In testing. 1.0 still runs daily operations.
.NET 8 · ASP.NET Core · React 19 · TypeScript · MSSQL · PWA

Dendrite Wiki
Local-first MCP server on npm that gives AI coding agents a living markdown knowledge base, project memory, and lightweight habits. One command (`npx -y dendrite-wiki`) installs it into nine agent clients, including Claude Code, Codex, Cursor, and Copilot. Its capsule profile cuts MCP startup from ~5,300 to ~540 tokens.
TypeScript · MCP · Node.js · VitePress · Tree-sitter · npm
