Full-stack engineer with 14 years of production experience and a drive to build things that feel as good as they function. I bring a creative, hands-on approach to every layer of the stack, from architecture decisions to the small UI details that make software genuinely enjoyable to use. Currently deep in AI-native development and looking for teams solving interesting problems. Project write-ups and screenshots at mfillalan.github.io/mfillalan-portfolio.

HIGHLIGHTS

- 14 years of professional software engineering experience
- Led WILD 2.0 modernization from legacy Web Forms to React + TypeScript + ASP.NET Core
- AI-native engineering workflow with durable memory, MCP, and agent tooling

CORE SKILLS

C# / .NET

ASP.NET Core

React

TypeScript

JavaScript

MSSQL / Oracle

REST API Design

Legacy Modernization

AI-Native Dev

MCP Protocol

GitHub / CI/CD

EDUCATION

M.S. Information Systems

ECPI University · 2011 – 2012

B.S. Computer Information Science

Simulation & Game Programming

ECPI University · 2006 – 2009

PROFESSIONAL EXPERIENCE

Software Engineer

May 2022 – Present

Serco

- Core engineer on WILD, a mission-critical naval web-based inventory management system.
- Led WILD 2.0 modernization from VB.NET / ASP.NET 3.5 Web Forms + Oracle to React + TypeScript + ASP.NET Core + MSSQL.
- Defined architecture direction, migration strategy, and feature delivery for a live production environment.

Software Engineer

Sep 2021 – May 2022

Valiant Integrated Services

- Maintained and enhanced the WILD platform under active contract transition.
- Delivered production features and defect fixes on ASP.NET Web Forms + Oracle stack.

Software Engineer

Feb 2019 – Sep 2021

Alliance Technical Services, Inc.

- Built and maintained inventory-management features supporting naval operational workflows.
- Partnered with stakeholders to turn requirements into production-ready features.

Programmer I

Feb 2013 – Nov 2017

Serco

- Developed functionality for WILD inventory management modules.
- Supported VB.NET and ASP.NET Web Forms code paths in a long-running production system.

Programmer

2009 – 2011

L-3 Communications

- Developed new features for SABER, a naval inventory management system using ASP.NET + VB.NET.
- Performed SQL Server data cleanup and maintenance to improve data integrity.

SELECTED PROJECTS

Dendrite Wiki

Local-first MCP server published on npm that gives AI coding agents a living docs/wiki markdown knowledge base, project memory, and lightweight rituals. One-command install (`npx -y dendrite-wiki`) targets nine agent clients including Claude Code, Codex, Cursor, and Copilot. Capsule profile cuts MCP startup overhead from ~5,300 to ~540 tokens.

TypeScript • MCP • Node.js • VitePress • Tree-sitter • npm

DendriteMCP

Rust memory daemon that gives coding agents durable, searchable context across sessions. SQLite + sqlite-vec for vector recall, a relationship graph with per-edge decay, and a tokio-scheduled subconscious that consolidates memories using a local Ollama model. Ships with an MCP stdio bridge and a React dashboard.

Rust · Tokio · Axum · SQLite · MCP · Ollama · React
