Full-stack engineer with 14 years of production experience. I build dependable software across the stack, from product experiences and APIs to data systems and architecture. I use AI agents and my self-built Tendrite harness to accelerate exploration and delivery while remaining accountable for architecture, verification, security, and quality. Write-ups and screenshots at mfillalan.github.io.

HIGHLIGHTS

- 14 years delivering production software and end-to-end features
- Led a live modernization of a mission-critical platform from VB.NET and Oracle to React, TypeScript, ASP.NET Core, and MSSQL
- Created Tendrite, an AI engineering harness for agent context, model routing, and Git-native review

CORE SKILLS

- C# / .NET
- ASP.NET Core
- React
- TypeScript
- JavaScript
- MSSQL / Oracle
- REST API Design
- Full-Stack Product Engineering
- AI Agent Workflows
- Codex / Claude Code / Grok
- MCP / Model Routing
- GitHub / CI/CD

PROFESSIONAL EXPERIENCE

Software Engineer May 2022 - Present
Serco

- Lead engineer for WILD 2.0, a live modernization of a mission-critical naval inventory system.
- Defined the migration architecture from VB.NET / Web Forms / Oracle to React, TypeScript, ASP.NET Core, and MSSQL.
- Set technical direction, planned the migration, and delivered production features while the existing platform remained in service.

Software Engineer Sep 2021 - May 2022
Valiant Integrated Services

- Maintained and improved the WILD platform during a contract transition.
- Shipped production features and fixes on the ASP.NET Web Forms / Oracle stack.

Software Engineer Feb 2019 - Sep 2021
Alliance Technical Services, Inc.

- Built and maintained inventory features supporting naval operations.
- Worked with stakeholders to turn requirements into production-ready features.

M.S. Information Systems
ECPI University | 2011 - 2012

B.S. Computer Information Science
Simulation & Game Programming
ECPI University | 2006 - 2009

Programmer I
Serco

Feb 2013 - Nov 2017

- Built functionality for WILD inventory modules.
- Maintained VB.NET and ASP.NET Web Forms code in a long-running production system.

Programmer
L-3 Communications

2009 - 2011

- Built new features for SABER, a naval inventory system on ASP.NET and VB.NET.
- Cleaned and maintained SQL Server data to improve integrity.

SELECTED PROJECTS

Tendrite

Created a local-first AI engineering harness that coordinates projects, multi-agent work, durable memory, model routing, and Git-native review. Demonstrates an end-to-end methodology for maintaining agent context and human control while shipping verified software. Open core; free local workspace at tendrite.dev.

Desktop · Local-First · Multi-Agent · Memory · Git · Model Routing

WILD 2.0

Lead engineer on the ground-up rebuild of a mission-critical naval inventory platform, from legacy VB.NET / Web Forms / Oracle onto .NET 8, EF Core, React 19, and an offline-first PWA. In testing ahead of full cutover.

.NET 8 · ASP.NET Core · React 19 · TypeScript · MSSQL · PWA

Dendrite Wiki

Local-first MCP server on npm that gives AI coding agents a living markdown knowledge base, project memory, and lightweight habits. One command (`npx -y dendrite-wiki`) installs it into nine agent clients, including Claude Code, Codex, Cursor, and Copilot. Its capsule profile cuts MCP startup from ~5,300 to ~540 tokens.

TypeScript · MCP · Node.js · VitePress · Tree-sitter · npm
