Full-stack engineer with 14 years of production experience. I care about software that works well and feels good to use, and I'm hands-on across the whole stack, from architecture down to the small UI details. Right now I'm deep in AI-native development and looking for a team solving interesting problems. Write-ups and screenshots at mfillalan.github.io/mfillalan-portfolio.

HIGHLIGHTS

- 14 years of professional software engineering
- Leading the WILD 2.0 rebuild from legacy Web Forms to React, TypeScript, and ASP.NET Core
- AI-native workflows built on durable memory, MCP, and agent tooling

CORE SKILLS

C# / .NET

ASP.NET Core

React

TypeScript

JavaScript

MSSQL / Oracle

REST API Design

Legacy Modernization

AI-Native Dev

MCP Protocol

GitHub / CI/CD

EDUCATION

M.S. Information Systems

ECPI University · 2011 – 2012

PROFESSIONAL EXPERIENCE

Software Engineer

May 2022 – Present

Serco

- Core engineer on WILD, a mission-critical naval inventory system.
- Leading the WILD 2.0 rebuild from VB.NET / Web Forms / Oracle to React, TypeScript, ASP.NET Core, and MSSQL.
- Set the architecture direction and migration plan, and deliver features for a live production system.

Software Engineer

Sep 2021 – May 2022

Valiant Integrated Services

- Maintained and improved the WILD platform during a contract transition.
- Shipped production features and fixes on the ASP.NET Web Forms / Oracle stack.

Software Engineer

Feb 2019 – Sep 2021

Alliance Technical Services, Inc.

- Built and maintained inventory features supporting naval operations.
- Worked with stakeholders to turn requirements into production-ready features.

B.S. Computer Information Science

Simulation & Game Programming
ECPI University · 2006 – 2009

Programmer I

Feb 2013 – Nov 2017

Serco

- Built functionality for WILD inventory modules.
- Maintained VB.NET and ASP.NET Web Forms code in a long-running production system.

Programmer

2009 – 2011

L-3 Communications

- Built new features for SABER, a naval inventory system on ASP.NET and VB.NET.
- Cleaned and maintained SQL Server data to improve integrity.

SELECTED PROJECTS

Tendrite

Local-first coding command center. Native desktop workspace that unifies projects, multi-agent missions, memory substrate, git-native review, and model routing, with a phone companion for steering work away from the desk. Open core; free local workspace at tendrite.dev.

Desktop · Local-First · Multi-Agent · Memory · Git · Model Routing

WILD 2.0

Lead engineer on the ground-up rebuild of a mission-critical naval inventory platform, from legacy VB.NET / Web Forms / Oracle onto .NET 8, EF Core, React 19, and an offline-first PWA. In testing ahead of full cutover.

.NET 8 · ASP.NET Core · React 19 · TypeScript · MSSQL · PWA

Dendrite Wiki

Local-first MCP server on npm that gives AI coding agents a living markdown knowledge base, project memory, and lightweight habits. One command (`npx -y dendrite-wiki`) installs it into nine agent clients, including Claude Code, Codex, Cursor, and Copilot. Its capsule profile cuts MCP startup from ~5,300 to ~540 tokens.

TypeScript · MCP · Node.js · VitePress · Tree-sitter · npm
